Drilling Hiatus

Harvey Keats, President of Donner Minerals Ltd., reports a drilling break at the mid-point in Phase 1 of the 1998 South Voisey Bay Exploration Program will be taken for a period of approximately three weeks. This decision was made, in consultation with Donner's joint venture partners, to allow the ongoing Pulse EM geophysical survey an opportunity to confirm existing geophysical and geological targets and identify additional geophysical targets for follow-up drilling in the remainder of the program. An announcement will be made when drilling resumes, however, detailed geological mapping, detailed and regional gravity geophysical surveys and the Pulse EM survey are all in progress.

ON BEHALF OF THE BOARD OF DONNER MINERALS LTD.

Harvey Keats
President
