News Release

Mr. Harvey Keats, President of Donner Minerals Ltd., reports that Major General Resources Ltd. has advised the Company that drilling has been completed in a second hole on the Donner/Major General joint venture property located in Labrador. Due to the limitations of the drilling equipment hole 2 was stopped at approximately 750 metres within a highly altered, hybridized, contaminated, graphitic gabbro containing disseminated sulphides. Hole 1, drilled to a depth of 560 metres, and hole 2 have been cased to allow re-entry at a future date.

The drilling of a contemplated third hole has been deferred pending the results of analysis of holes 1 and 2.

ON BEHALF OF THE BOARD OF DONNER MINERALS LTD.

Harvey Keats

President
